The Social Construction of What? Ian Hacking, 1999 Lost in the raging debate over the validity of social construction is the question of what precisely is being constructed Facts gender quarks reality Is it a person An object An idea A theory Each entails a different notion of social construction Ian Hacking reminds us His book explores an array of examples to reveal the deep issues underlying contentious accounts of reality Especially troublesome in this dispute is the status of the natural sciences and this is where Hacking finds some of his most telling cases from the conflict between biological and social approaches to mental illness to vying accounts of current research in sedimentary geology He looks at the issue of child abuse very much a reality though the idea of child abuse is a social product He also cautiously examines the ways in which advanced research on new weapons influences not the content but the form of science In conclusion Hacking comments on the culture wars in anthropology in particular a spat between leading ethnographers over Hawaii and Captain Cook Written with generosity and gentle wit by one of our most distinguished philosophers of science this wise book brings a

much needed measure of clarity to current arguments about the nature of knowledge

Social Constructionism, Discourse and Realism Ian Parker, 1998-06-18 This book charts a clear and accessible path through some of the key debates in contemporary psychology Drawing upon the wider critical and discursive turn in the human sciences Social Constructionism Discourse and Realism explores comprehensively the many claims about what we can know of reality in social constructionist and discursive research in psychology Relativist versus realist tensions go to the heart of current theoretical and methodological issues not only within psychology but across the social and human sciences By mapping the connections between theory method and politics in social research and placing these within the context of the broader social constructionist and discursive debates the int

An Introduction to Social Constructionism Vivien Burr, 2006-07-13 An invaluable clear guide to social constructionism for all perplexed students who want to begin to understand this difficult area Introduction to Social Constructionism is a readable and critical account of social constructionism for students new to the field Focusing on the challenge to psychology that social constructionism poses Vivien Burr examines the notion of personality to illustrate the rejection of essentialism by social constructionists This questions psychology's traditional understanding of the person She then shows how the study of language can be used as a focus for our understanding of human behaviour and experience This is continued by examining discourses and their role in constructing social phenomena and the relationship between discourse and power However the problems associated with these analyses are also clearly outlined Many people believe that one of the aims of social science should be to bring about social change Vivien Burr analyses what possibilities there might be for change in social constructionist accounts She also addresses what social constructionism means in practice to research in the social sciences and includes some guidelines on doing discourse analysis

Social Constructionism Andy Lock, Tom Strong, 2010-03-25 Social Constructionism Sources and Stirrings in Theory and Practice offers an introduction to the different theorists and schools of thought that have contributed to the development of contemporary social constructionist ideas charting a course through the ideas that underpin the discipline From the New Science of Vico in the 18th century through to Marxist writers ethnomethodologists and Wittgenstein ideas as to how socio cultural processes provide the resources that make us human are traced to the present day Despite constructionists often being criticised as relativists activists and anti establishment and for making no concrete contributions their ideas are now being adopted by practically oriented disciplines such as management consultancy advertising therapy education and nursing Andy Lock and Tom Strong aim to provoke a wider grasp of an alternative history and tradition that has developed alongside the one emphasised in traditional histories of the social sciences

social constructionist theorists over that period as well as recent debates about the future of the perspective These contributions redefine the purpose and central questions of social problems theory and articulate a research program for analyzing social problems as social constructions A generation of theorists has been trained in the constructionist perspective and has extended it through numerous analyses of diverse aspects of contemporary social life The debates in this volume pose fundamental questions about the major assumptions of the perspective the ways in which it is practiced and the purposes of social problems theory Their point of departure is Ibarra and Kitsuse's essay cutting new theoretical ground in calling for investigating vernacular resources especially rhetorical forms in the social problems process Contributors are forceful proponents both within and outside of the social constructionist community who take a broad array of positions on the current state of social problems theory and on the rhetorical forms that need exploring They also lay down the general lines for diverse and often competing programs for the future development of the constructionist agenda **Examining**

Gergen, K.E.

Davis, 2012-12-06 This volume grew out of a discussion between the editors at the Society for Experimental Social Psychology meeting in Nashville in 1981 For many years the Society has played a leading role in encouraging rigorous and sophisticated research Yet our discussion that day was occupied with what seemed a major problem with this finely honed tradition namely it was preoccupied with accurate renderings of reality while generally insensitive to the process by which such renderings are achieved This tradition presumed that there were brute facts to be discovered about human interaction with little consideration of the social processes through which factuality is established To what degree are accounts of persons constrained by the social process of rendering as opposed to the features of those under scrutiny This concern with the social process by which persons are constructed was hardly ours alone In fact within recent years such concerns have been voiced with steadily increasing clarity across a variety of disciplines Ethno methodologists were among the first in the social sciences to puncture the taken for granted realities of life Many sociologists of science have also turned their attention to the way social organizations of scientists create the facts necessary to sustain these organizations Historians of science have entered a similar enterprise in elucidating the social economic and ideological conditions enabling certain formulations to flourish in the sciences while others are suppressed Many social anthropologists have also been intrigued by cross cultural

The Social Construction of Public Administration Jong S.

Jun,2012-02-01 In this conceptual guided tour of contemporary public administration Jong S Jun challenges the limitations of the discipline which he argues make it inadequate for understanding today's complex human phenomena Drawing on examples and case studies from both Eastern and Western countries he emphasizes critical and interpretive perspectives as a counterforce to the instrumental technical rationality that reduces the field to structural and functionalist views of management He also emphasizes the idea of democratic social construction to transcend the field's reliance on conventional pluralist politics Jun stresses that public administrators and institutions must create opportunities for sharing and learning among organizational members and must facilitate interactive processes between public administrators and citizens so that the latter can voice their problems and opinions The future role of public administrators will be to transcend the limitations of the management and governing of modern public administration and to explore ways of constructing socially meaningful alternatives through communicative action and the participation of citizens
